DETAILED ACTION

Response to Amendment

The preliminary amendment filed on 09/30/2005 is entered and acknowledged by the Examiner. Claims 1-35 and 38-75 are currently pending in the instant application. Claims 36 and 37 have been canceled.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) **1-13**, drawn to a method for producing an oxidant.

Group II, claim(s) **23-26, 29-35, 45, 48-50, 59-61, 65, 69, 72, and 73**, drawn to a method for producing an electrolytic capacitor.

Group III, claim(s) **27, 28, 55, 58, 62, 63, 66, 67, 70, 71, 74, and 75**, drawn to a method for producing a conductive layer.

Group IV, claim(s) **15-22, 39-44, 46, 47, 51-54, 56, and 57**, drawn to a mixture composition.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or

corresponding special technical features for the following reasons: Group I does not have all the technical features described in Group II such as polymerized by chemical oxidation at temperatures of from -10°C to 250°C on an oxide layer to form the corresponding polymers.

The inventions listed as Groups I and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I does not have all the technical features described in Group III as polymerized by chemical oxidation at temperatures of from -10°C to 250°C on substrate to form the corresponding conductive polymers.

The inventions listed as Groups I and IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I does not have all the technical features described in Group IV such as a mixture comprising of an oxidant, a precursors, and optionally a solvent.

Due to the complexity of the restriction requirement, a telephone call was not made to request an oral election to the above restriction requirement.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the

record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
